KEY ACHIEVEMENTS

A complex tracking system that merges more than one delivery company

I've gained valuable insights into the operations of delivery companies and the complexities involved in tracking packages. I'm proud of the knowledge I've acquired from understanding these systems

EDUCATION

Full Stack Web Development Certification
MIMO : mimo.org   Date period

Full Stack Web Development Certification
GoMyCode Tunisia : gomycode.com   2020

Pursuing a bachelor's diploma in computer science
Higher Institute of Multimedia Arts of Manouba   2024 - 2027

EXPERIENCE

Full Stack Developer
IRRI PRO   Tunisia
landscaping engineering   2019

· Developed a responsive front-end application using React.js.
· Designed and implemented a relational database using SQLite.
· Built a back-end server using Express.js.
· Oversaw code quality to ensure the security of the system.
· Hosting the web application on Heroku
· Reserving a domain name from GoDaddy
· Deploying the web application and maintaining it!

Software development with a focus on Enterprise Resource Planning (ERP) systems.
Samurai club   Tunisia
Martial arts academy Specialized in boxing and taekwondo   2021

· Established a local server on a Raspberry Pi 4 using a minimal Ubuntu distribution.
· Built the server using Express.
· Designed and implemented a database using SQLite.
· Created a desktop application using Qt Designer for local management, connected to the server.
· Set up a global server hosted on Heroku.
· Developed a custom API to connect the local and global servers.
· The global server informs students and sends real-time notifications about the business's current status, including new subscriptions, expirations, and more.
· Developed a React.js application for the front end, connecting students and coworkers to the global server.
· Oversaw code quality to ensure the security of the system.
